

Features added to Troy Vision V3.0.56

Automated CV Parsing

A less stringent duplication check option has been added to the automated CV parsing function, which will only perform a duplication check using the email address stored within the CV. If a candidate is found with this email address, their CV will be updated, otherwise a new candidate will be created. The setting can be found within the auto parser's configuration window.

Parser Configuration

Configure the settings for automated CV parser

Category to store parsed CV's within: Candidates Own

Store updated CV's within: St George

Perform duplication check on email address only *Candidates without an email address will added without a duplication check*

If candidate already exists overwrite?

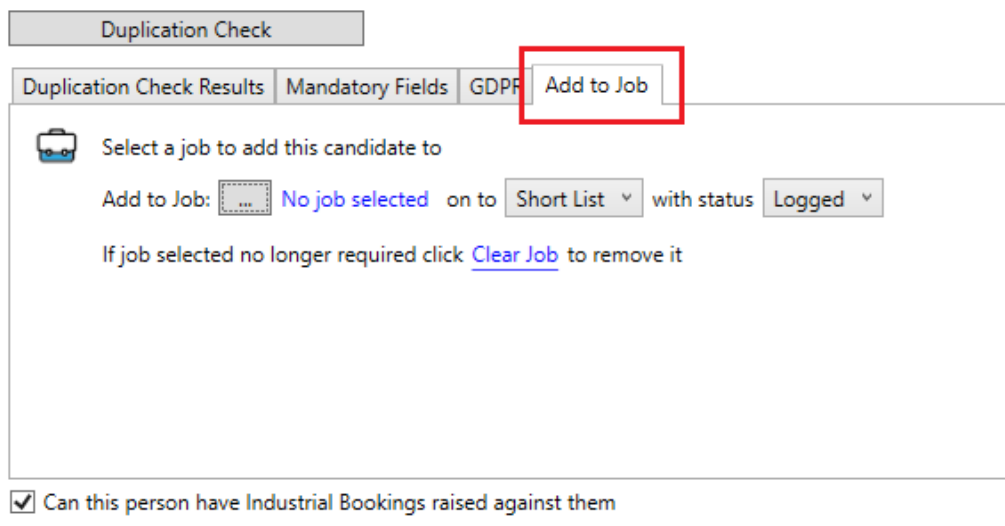

Ignore candidates without any contact details:

Country to use if parsed country not recognised: United Kingdom

Figure 1, configuring the auto parser to perform a duplication check on just the email address

Manual CV Parsing

It is now possible when manually creating a candidate either by scanning in their CV or entering their details by hand, to add the candidate to a job. This can be carried out by clicking the 'add to job' tab at the bottom of the window after a duplication check has been carried out.

Duplication Check

Duplication Check Results Mandatory Fields GDPR Add to Job

Select a job to add this candidate to

Add to Job: No job selected on to Short List with status Logged

If job selected no longer required click [Clear Job](#) to remove it

Can this person have Industrial Bookings raised against them

Features added to Troy Vision V3.0.56

All History Tab

The 'all history' tab when viewing a candidate / contact has been enhanced so that you can view the individual's employment together with their history. This can be achieved by clicking upon the 

icon. To revert back to just viewing the history, click the  icon. The employment will be shown underneath the history as shown in *figure 3*.

Employment History

Date From	Date To	Company Name	Employ Position	Work Email	Work Phone	Package Value	Reason For Leaving	Contact Type	Reports To
01-May-2018		Baddow Hall Group	Operations Director			0.00			
		David Abbott & Partners	Operations Director			0.00			

Figure 3 – Employment history shown alongside the contact history

Once set the view will be remembered, so that the next time you open a candidate / contact window and click on the 'all history' tab the view last used will be presented by default. To change the columns shown in the Employment pane, switch to the person's main Employment / Qualifications tab and make the required changes there. The person's window must be closed and reopened for the changes to be reflected in the All History / Employment view.
