Emailing contacts from jobs

A new setting within the personal settings now allows you to choose whether the second (other) contact on a job is automatically cc'd when sending the job's primary contact an email. By default, this setting is off.

Personal Settings

- General
- Alerts and Email**
- People
- Jobs
- Searching / Views

Settings for the personalisation of alerts within Troy

- Include Job Alerts (when another consultant adds a person to one of your jobs)
- Alert me if any candidate/contact additional date fields are about to expire
 - Days before expiry: 14

Settings for the personalisation of email entry

- Insert paragraph when enter/return key pressed when composing an email
- Warn me before sending an email which is to be saved within the Outlook drafts folder
- Close email results window if there are no errors

Settings for candidate response emails

- Remove candidate response email after processing it

Settings for emailing contacts on a job

- Automatically CC the second job contact

Salary Survey

A new salary survey feature has been introduced within the people / GDPR view which will show for a list of job titles over a given number of years, the typical, maximum and minimum salaries. A percentage increase between years will also be displayed.

The survey works off employment, placement and contract information contained within the database and you can choose to filter upon the job title and the period (in years).
