

Features added to Troy Vision V3.0.69.0

Interview Charts View

A new view within the main Troy page has been introduced which shows a breakdown of interviews in chart form. This new view can be found within the View Options drop down within the main Troy menu on the front screen.

Figure 1 – New Interview Charts View

The view shows a breakdown of the number of interviews arranged in the current year (top section) and a breakdown and league table of the interviews by user field in the bottom section. You can see the interviews for a period of time, consultant or team by using the various drop boxes within the view.

The view has two tabs, charts (described above) and List, *figure 2*. The list tab will show more detailed information about the interviews for a given date range, filtered by consultant and team. The list can be exported and you can view the candidate, company or job upon which the interview was arranged by right mouse clicking upon the list.

Features added to Troy Vision V3.0.69.0

Figure 2 – Interview list

The list date range can work on either the interview date or the date the interview was arranged by ticking/unticking the box entitled 'Use interview date'.

Other

A problem has been resolved when scanning in CVs using the Dutch language, that the surname of the candidate was prefixed with a space.

When showing holidays within the availability calendar view the weekends are now included.
